

Kapı ve Pencere Kolları

Merdiven Korkulukları

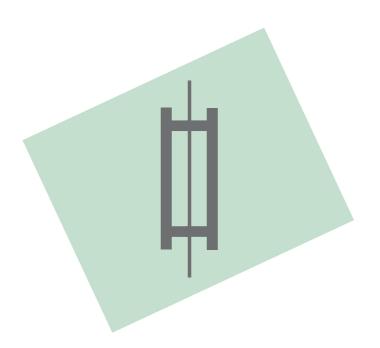

Mobilya Aksesuarları

Halı Profilleri

Dış mekanlarda çekme ve itme kol olarak kullanılan kapı kolları değişik çaplarda dolu alüminyum esaslı veya paslanmaz çelik malzemeden farklı tiplerde üretilmektedir.

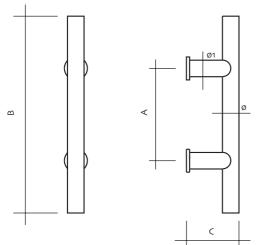

Standart boyutlar dışında özel boyut ve tiplerde üretilebilen çekme kollar, metal, ahşap, PVC ve cam kapılarda tek veya çift taraftan montajlı olarak kullanılabilmektedir.

Dış Kapı ve Emniyet Kolları

Dış Kapı ve Emniyet Kolları

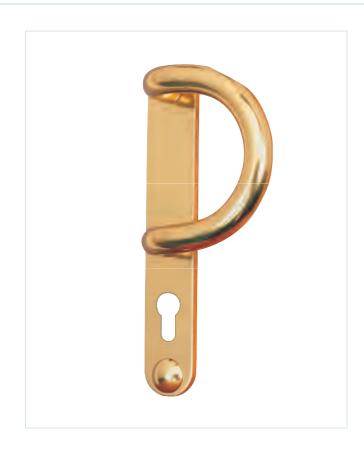

Daire giriş kapılarında kullanılan kollar, dıştan sabit, içten kilide kumanda eden farklı modelde kollarla kombine edilerek kullanılmaktadır. Emniyet kolları tüm bağlantıların içten yapılması nedeniyle aynanın dışarıdan sökülmesine ve kilide müdahale edilmesine engel olmaktadır. Ayrıca içten yapılan M8 civatalı bağlantıda, kapının kilit mekanizması yuvası nedeniyle zayıflayan serenini de mekanik olarak takviye etmektedir.

Dış kapılar için kullanılan kapı tokmakları Ekstrude Alüminyum profilden veya paslanmaz çelik yapılmaktadır. Kapı tokmakları tek veya çift taraflı olarak kullanılabilmektedir. Çift taraflı kullanımda içten kilide kumanda eden kol kullanılabileceği gibi istenirse kilide kumanda eden kapı tokmakları da üretilmektedir. Bu uygulamada kapıda geniş kilit kullanılmalıdır.

İç kapı kolları 20 mm çapında alüminyum veya paslanmaz çelik malzemeden değişik modellerde üretilip ayna ve rozetlerle kombine edilerek oluşturulan seriler halinde kullanılmaktadır. Her seride anahtar ve kilit bareli kullanılabilir. Banyo kapı kolları içten kilitlenebilir ve dıştan emniyet çıkışlı olarak dizayn edilmiştir. Rozetle kombine edilen iç kapı kollarında geniş kilit kullanılmalıdır.

Alüminyum

Süpürgelik Profili 7101.00

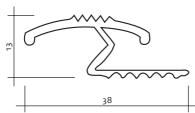

İki parçadan oluşmaktadır. Alt parça duvara vida ile bağlanarak ve üst parça alt parçaya geçirilerek kolayca monte edilmektedir. Gizli kablo kanalı sayesinde çok amaçlı bir kullanım esnekliği sağlamaktadır. Aynı zamanda Halı bitiş profili olarak da kullanılmaktadır.

Alüminyum

Kot Farkı Profili 7151.00

Her iki tarafı veya sadece bir tarafı halı döşenecek ve aralarında yaklaşık 10 mm kot farkı bulunan zeminlerde başarı ile kullanılan bir profil tipidir. Monte edildikten sonra kot farkına göre ezilerek zemine uydurulur.

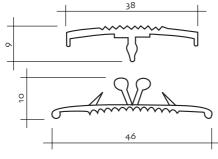

Alüminyum

Halı Birleştirme Profili 7201.00

Halı ek yerlerinde kullanılır. İki parçadan oluşmaktadır. Alt parça zemine monte edilip iki yandan halı tırnaklara takıldıktan sonra üst parça kapanarak monte edilir.

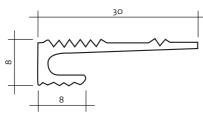

Alüminyum

7251.00

Zemine vidalanarak veya yapıştırılarak monte edilir. Bu profillerde halı tırnaklara geçirilerek veya profilin arasına sıkıştırılarak gergin tutulur. Halının sıkıştırılması için, profilin üst kısmı araya ahşap takoz konulup çekiçle vurularak hafifçe ezilmelidir.

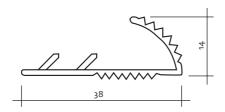

Alüminyum

Halı Bitiş Profili 7252.00

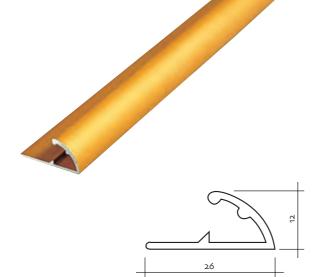

Zemine vidalanarak veya yapıştırılarak monte edilir. Bu profillerde halı tırnaklara geçirilerek veya profilin arasına sıkıştırılarak gergin tutulur. Halının sıkıştırılması için, profilin üst kısmı araya ahşap takoz konulup çekiçle vurularak hafifçe ezilmelidir.

Alüminyum

Halı Bitiş Profili

7253.00

Zemine vidalanarak veya yapıştırılarak monte edilir. Bu profillerde halı tırnaklara geçirilerek veya profilin arasına sıkıştırılarak gergin tutulur. Halının sıkıştırılması için, profilin üst kısmı araya ahşap takoz konulup çekiçle vurularak hafifçe ezilmelidir.

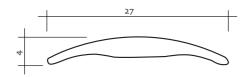

Alüminyum

Ek Yeri Profili

7301.00

Halı ek yerlerine üstten vidalanarak monte edilir. Uygun aralıklarla delinmiş, havşalanmış işlenmiş vida, dübel gibi montaj malzemeleriyle birlikte sevk edilir.

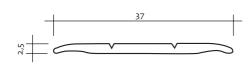

Alüminyum

Ek Yeri Profili

7302.00

Halı ek yerlerine üstten vidalanarak monte edilir. Uygun aralıklarla delinmiş, havşalanmış işlenmiş vida, dübel gibi montaj malzemeleriyle birlikte sevk edilir.

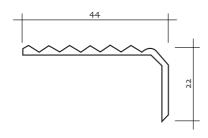

Alüminyum

Merdiven Profili

7351.00

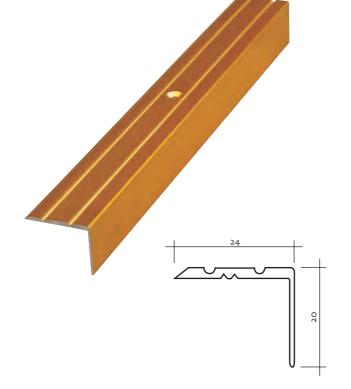

Merdiven basamaklarına vidalanarak monte edilen profiller montaj için en uygun aralıklarla delikleri delinerek, havşalanmış ve vida, dübel gibi montaj malzemeleriyle birlikte teslim edilir.

Alüminyum

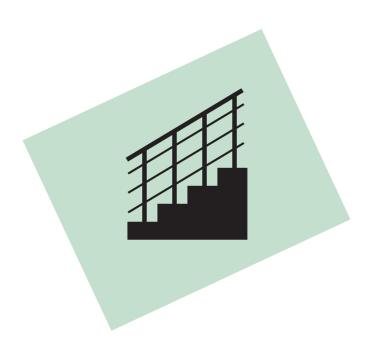

Köşe Profili

7401.00

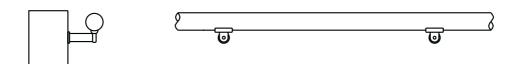

Özellikle kolon, duvar gibi yerlerin köşe noktalarını kapatmak için kullanılır. Köşelere vidalanarak veya yapıştırılarak monte edilen profiller montaj için en uygun aralıklarla delikleri delinerek, havşalanmış ve vida, dübel gibi montaj malzemeleriyle birlikte teslim edilir.

AÇILIMLAR

MALZEME

Alüminyum (AlMgSio,5 Wst. - Nr. 3,3206 DIN 1725):

Kalite, estetik ve sağlamlığı temel alarak üretilen standart ve özel tüm alüminyum POLIFORM ürünleri batı normlarına uygun kalitede ekstrude alüminyum alaşımı veya kokil döküm teknolojisi kullanılarak üretilir. Mekanik ve kimyasal ön işlemlerden sonra TS 4922 normlarına uygun şekilde anodize edilerek renklendirilir. İstenildiğinde ön yüzey işlemler sonrası kromatlanarak RAL renklerinde elektrostatik olarak da boyanabilir.

Paslanmaz Çelik (Krom - Nikel Çeliği Wst. - Nr. 1,4301 DIN 17440):

Çelik, yüksek bir aşınma dayanımına sahip olduğu için iç ve dış uygulamar için uygundur. Paslanmaz Çelik kapı, pencere kolları, çekme kollar ve merdiven korkulukları yaşadığınız ortamlara uyum sağlar. Aşınma ve darbelere karşı dayanıklıdır. Şekillendirmeden dolayı modern kullanım alanı yaratır. Paslanmaz Çelik tüm POLIFORM ürünleri, parlak ve satine olarak üretilebilir.

MALZEME ve YÜZEY İŞLEM KODLARI

- 10 Ham Paslanmaz
- 11 Satine Paslanmaz
- 12 Parlak Paslanmaz
- 13 Mat Paslanmaz (Kumlanmış)
- 14 Elektrostatik Boyalı Paslanmaz
- 20 Ham Alüminyum
- 21 Eloksallı Alüminyum (Naturel)
- 22 Elektrostatik Boyalı Alüminyum (Beyaz)
- 23 Satine Alüminyum
- 24 Parlak Alüminyum
- 25 Mat Alüminyum
- 26 Eloksallı Alüminyum (Renkli)
- 27 Elektrostatik Boyalı Alüminyum (Renkli) (RAL)
